THE STORY OF DEADLY TOWERS

After the title screen appears the story of Deadly Towers will appear on the screen.

GAME DESCRIPTION

Your final goal is to kill Rubas to restore peace to the kingdom. However, the entrance to the King of the Devils hidden rooms is sealed. In order to open the entrance you must climb up each of the seven bell towers, remove the bells and burn the towers.

HOW TO USE THE CONTROLLER

In this game the controller can control many things. Notice that the controls will change when switching between the main (GAME screen) and sub-screens (INVENTORY/STATUS, SHOP and PASSWORD ENTRY screens).

Control Pad

You can move Myer in 8 directions. During the INVENTORY/STATUS and PASSWORD ENTRY screens, the control pad moves the cursor to choose items or letters.

**Control pad**

- **Move up**
- **Move right**
- **Move down**
- **Move left**

SELECT button

When the select button is pressed during the game, the INVENTORY/STATUS screen appears. Pressing SELECT again will return you to the main screen.

START button

Use this button to start the game.

**“A” Button**

Fires your sword and selects items to buy (you buy items in SHOP screens). When Prince Myer is standing underneath an item to buy, pressing this button will buy the item (if you have enough Ladder). While in the INVENTORY/STATUS sub-screen, pressing this button will use the item that is highlighted by the arrow.

**“B” Button**

During the INVENTORY/STATUS screen, pressing this button twice will throw away the item highlighted by the arrow. During the PASSWORD ENTRY screen, pressing this button will move the cursor back one letter.
HOW TO UNDERSTAND THE SCREEN

You must learn to understand the screen to play the game. There is the main (GAME) screen and the two sub-screens (INVENTORY/STATUS and SHOP screens).

Current hit points — this is your life power. If this number becomes '0' your quest is over.

Maximum hit points (HP MAX)

Entrance to the next area. If you enter this area the screen will change to the next scene.

The jagged edges are cliffs. Prince Myer will not fall off most edges, but if he walks on a broken edge he will fall.

In the main adventure screen, many monsters will attack Prince Myer. In this area, he can move up, down, left, right and diagonally.

Shop Screen

You can buy many items. In order to buy an item, stand in front of an item and press the "A" button. By doing so, the item purchased will be displayed in the INVENTORY/STATUS screen's item column.

Money Prince Myer is carrying.

The shop owner.

Items which are sold in one shop are different than items sold in another.

Price of items — the currency in the Kingdom of Willner is Ludder.
Sub-Screen (INVENTORY/STATUS)

During the game, you can get all the information about Myer by using this sub-screen.

This sub-screen is divided into 5 parts: STATUS, DEFENSE, ATTACK, ITEM and BELL. Each part displays needed information for fighting. Utilize this information well to help carry out your task.

STATUS - The current hit points and maximum hit points. Underneath, the money (Ludor) that Myer is carrying is displayed.

ITEMS - Items which are collected will be displayed in this area. In order to use an item, move the arrow over the item and press the "A" button. In order to throw an item away, select the item the same way and press the "B" button TWICE.

BELL - Magical Bells which are removed from each tower are displayed here. (When you burn a tower down, a flame is displayed).

DEFENSE - From the left, the helmet, shield or armor type that your are wearing is displayed.

ATTACK - Attack items are displayed in the order of (from the left) the sword, shooting mode and gloves worn.

SEVEN BELLS ECHO THROUGHOUT THE MAGIC PALACE

Rubes' magic palace is located in the Northern mountains of the Wilmer Kingdom. This is an old diagram of the palace. However, the resonance of the seven bells created many distorted spaces which became the invisible entrances to underground dungeons, secret rooms and a parallel world.
HOW TO PLAY THE GAME

BURN DOWN THE SEVEN BELL TOWERS
Your objective is to reach the seven towers. Each tower has one bell which should be burnt by the holy flame. The bells are at the tops of the towers. After burning all the bells you will be able to open the entrance to the King of the Devil's room.

STARTING THE GAME
When you play the game for the first time or continue after a game is over, press the START button at the title screen. When the screen changes to the password input screen, press the START button again. When you wish to continue your game after you quit, enter your password in the password entry screen to start the game. The control pad moves the entry cursor up, down, left and right. Pressing the "A" button chooses that letter. Pressing the "B" button moves the cursor back one space. By using the password, you can continue the game with maximum hit points achieved (during the last game) and still retain some of your items.

Prince Myer has failed!
When you are attacked by an enemy or if you touch an enemy, the player's hit points will decrease. If you fall off a broken edge or over a cliff or if the hit points dwindle to 0, your quest is over.

Collecting hit points and money—
When you kill enemies, sometimes they leave money or hearts. A heart will give you hit points. Money helps you to buy items. Don't forget to collect the circle hearts. These increase your maximum hit points (up to 299).

About your items—
An item can be picked up while wandering or can be bought at shops which are hidden in certain areas.

Enhancing your defenses—
When you start, you don't have any armour or special items. Wear items as soon as you get them.

Enhancing your attack—
To do this, increase the power or speed of your sword.

Use caution in the parallel world—
Sometimes an invisible entrance will take you to a parallel world. There will be only one exit to the world where you came from. Search all areas of the castle carefully to find the parallel worlds.

Big underground dungeons—
Same as the parallel worlds, the entrances to the underground dungeons are invisible. Each dungeon consists of about 200 rooms and each room has enemies. A few rooms in the dungeon have a magical pattern on the floor which may be the entrance to a shop, the exit of the dungeon or a good map marker.

Secret rooms are hidden throughout the towers and castle. Search every area by walking around the entire screen in each area.

Get the bells!—
When you climb to the top of each tower, you have to fight with the guardian of the bell. If you win, climb the ladder and get the bell.

Burn the tower with the sacred flame—
When you get the bell, go back to the underground and touch the holy flame. The bell will be thrown into the fire and the tower will burn.

What about the entrance to the King of the Devil's room?
When you collect and burn all seven bells, the entrance to the King of the Devil's room will be opened (it is hidden).

Continuing your game—
When the game ends, write down the password displayed on the screen. To get a new password you have to end the game by dying (losing all your hit points).
ATTACK ITEMS —
Fighting Off The
Monsters!!!

This section introduces
the items that can be
obtained. No matter how
useful the item, if you
don't know how or where
to use it, it is useless.
Learn your items well.

NORMAL SWORD — This
sword is a good match
for most enemies.

GLOVE (blue) — Increases
the speed of the sword
(slow).

NORMAL GLOVE (grey) —
You can shoot the sword
at medium speed. You'll
still feel safe even when
you miss shoot.

DRAGON SLAYER — As
the name says, it has
very strong attacking
power (it gives you
confidence). Get it as
soon as you can.

GLOVE (gold) — This
is a miraculous weapon.
It shoots the sword
at maximum speed. It
will increase the power of
the sword drastically. If you
carry this, you are a
master of swordfighting.

SPLENDOR — This is the
golden sword of legend.
This beautiful, sparkling
sword will illuminate
anything. This is the most
powerful sword in the
game.

INCREASING YOUR
SKILLS (attack items)

HEARTS — The heart
icon will increase your
hit points. The circle
will increase your
maximum hit points
(up to 299).

DOUBLE SHOT — Allows
you to shoot two swords.

PARALLEL SHOT — When
you have this item, it
allows you to shoot two
swords in parallel.

LUDER — When you kill
enemies, they leave
money. A 'star' is 5
Luders; an 'L' is one
Luder. Collect them
diligently.

HYPER HELMET — This is
the helmet with the best
defensive strength. It
controls the enemy's
attack by using magical
power so the damage to
you is minimal.

CHAIN HELMET — This is
a chain-mail helmet. It's
better than nothing.

IRON HELMET — A strong
helmet, made of iron.
Defensive strength is
medium.

SHIELD — Shield made of
bronze. Easiest to get but
weakest defense (it's
better than none).

The maximum amount of
Luders that can be carried is
250 pieces.

Maximum number of hit points is 299.

If the item column in the INVENTORY/STATUS screen is filled, you cannot carry any more items. You have to
throw away some items by pressing the "B" button TWICE while the selection arrow is over the item.
LION SHIELD — Shield made of iron. By having this shield and the matching helmet and armor, it will increase your overall defensive strength, however this shield used alone only offers a medium strength defense.

LEATHER ARMOR — This armor is made of leather. This is the lowest class of armor.

PLATE ARMOR — Armor made of iron plates. It's surface is fairly hard and will withstand most shocks.

SHIELD OF THE KING — The most powerful shield. It is guarded by holy power and it shines golden.

HYPER ARMOR — Magical armor made out of forged steel. It provides the maximum defensive strength. It creates an energy shield around the player which is driven by the good will of the player.

CRYSTALS
Blue — Decreases enemy's hit points.
Green — Freezes the enemies for a short time.
Orange — Changes the color of the dungeon's exit.
Red — Warps to the dungeon's exit.

OTHER ITEMS — Use These In Specific Situations

There are many items other than weapons and armor which are very helpful to complete your quest. Using these items wisely will help you defeat Rubies.

SCROLLS
Blue — Warps you inside the dungeon (you may warp to a closed room).

Green — Warps you to the starting point (of your quest).
Orange — Warps you to the holy flame.
Red — Unknown (?).

DRINKS
Blue — Restores hit points (up to the maximum).
Green — Restores 200 hit points.
Orange — Restores 100 hit points.
Red — Restores 50 hit points.

Note: Hit points will not exceed the maximum hit points.

NECKLACES
Blue — When used, you become temporarily invisible.
Green — Temporarily increases your defensive strength.
Orange — Increases your defensive strength.
Red — Unknown (?).

MAGIC KEY
There is a magical key which shines in gold. You must find out for yourself how to use it.

MAGIC MACE — This magic mace will protect Prince Myer. The effect of the Magic Mace is not known, but it will save the prince's life.

OTHER ITEMS.

HYPER BOOTS — When you walk a long way, you get tired. You get especially tired of going up and down stairs. If you wear these...

FIGURE — The effect of this is unknown, however the shape of this object seems to carry some significance to understanding secrets of the game. Try using it against different enemies.

CHALICE — If you want to get certain items but you don't have any money, you can use this cup to make you rich.

You cannot use magical items, crystals or scrolls, inside of a shop.

If you want to collect the most powerful items, you must venture into ALL the dungeons.

When you don't know the name of the item that you collected, change to the INVENTORY/STATUS screen and move the arrow in the item column to see the name.
ENEMY CHARACTERS - Frightening Monsters That Gather For The Echo Of The Seven Bells.

In order to do well on your quest, knowing enemy characters is important. If you become familiar with the characteristics of the monsters introduced here, the game will be more interesting. Here are the descriptions of some of the enemies you’ll encounter in the kingdom and dungeons.

UNKNOWN RACES

Fire - These are direct descendants of fire races.

Spark - These go up and down the air very quickly. They are always found in groups. In many cases, they live in the cliffs near the paths.

Fog - These are included in the fire races; however, their body is not flame. Precisely, they are energy life forms. They float through the air and may appear out of mid-air.

FIRE RACES

Do Not Underestimate These Enemies Because Of Their Size!

SLIME RACES

Blander - This mollusk-type creature moves like a caterpillar.

Anemone - This is another mollusk-type creature. Some have tentacles, some don’t, but all spit fireballs from their mouths.

RAT RACES

Rat/Fast Rat - These rats have wings on their backs which allow them to fly.

DEVIL RACES

Black Box - This devil lives in the magic palace. Indeed they are devils, their attack and defense powers are strong.

Pitfall - Used to be a fairy, however after angering Rubis, their appearance was changed and they were imprisoned. You don’t have to kill them.

Crowler - This monster-type creature moves like a caterpillar.

Small Devil - These devils live in the magic palace. Indeed they are devils, their attack and defense powers are strong.

・ There are different types of monsters, even though they may appear the same. Be careful, their life force and attacking powers are different, too.

・ Be careful when you are fighting near an entrance or exit. If you get hit, you may be pushed into another area.

・ Outside the castle and in the towers there are important items hidden. Be sure to search for anything hidden.

・ Hearts and money appear randomly. If you want to collect a lot of them, go to an area where there are plenty of monsters to slay.
FISH RACE
Wall Fish—This ground
fish lives in the walls
inside the tower and
outside of the castle.

INSECT RACES
Baramus—This is a
mollusk that lives in the
tower and dungeons. It
usually rests by sticking
to the wall, but if you get
close it will fly through
the air.

CLONE RACES
Snake—This small
snake lives in the
dungeons and is usually
found in groups. You
won’t have time to kill
them all.

GHOST RACES
There are several
different ghosts inhabiting
the tower. All are deadly,
draining the human spirit
and should be avoided or
killed when possible.

WEREMONKEY—A
humanoid-monkey
with the agility of a
human. Its personality
is moody. It mainly
appears in

WERECAT—Rubas
created the weremane
enemies for his personal
servants by using black
magic. The WERE CAT
was created out of a cat.

THE MONSTERS CREATED
BY BLACK MAGIC
HUMANOID RACES

WERETIGER—Be especially
careful around the black
WERETIGER, it’s not only
dangerous but cruel. Too.

Cloaked humans created
by Rubas, King of the
Devils. Since Rubas has
inspired his spirit into
these clones, they will not
die no matter how often
you attack them.

All the Humanoid Types Are Very
Strong!

Lizard Man—This is a
humanoid-type
chameleon. Like other
reptiles, it’s crafty. These
are hated by other
humanoid races.

Fire Demon—Its
personality is dangerous,
however it has a lot of
pride (for a follower of
Rubas). It was created
from a wolf.

A room where Black Bus is around will have an item shop.

Strong humanoid races are vulnerable to certain items.

When you get a ball at the top of the tower, and return to the underground, the entrance to the tower will

After you get the bell from the tower, the enemies in the tower and outside the tower may become more
powerful.

Burning a bell will allow you to recover hit points. But you can also keep it and burn it later.
HELPFUL TIPS

Don't let the circle hearts get away—
Collecting circle hearts is the only way to increase your maximum number of hit points. Hearts will only restore hit points up to your maximum, but not beyond. (Circle hearts are located in paths and towers, etc. Collect them as you find them.)

Useless shots may lead you to death—
Once you fire the sword you cannot fire the next sword until the first sword disappears from the screen. If you are not wearing the glove to increase your sword speed, you might not be able to fight back quickly enough.

Don't let the chance go when you hit the monster—
When your sword hits a monster, the enemy movement will stop. Keep firing as you walk closer to the enemy.

Understanding the movement of enemies—
Enemy characters have specific movement patterns depending on the placement or type of monster. Understanding these patterns will help you defeat, as well as avoid, dangerous enemies.

Utilize 8 direction movement—
Remember, Prince Myer can move and shoot in eight directions. Mastering all eight directions is especially important when fighting on stairs.

About parallel worlds . . .
Enemy attacks are more powerful and exits are more difficult to find in parallel worlds, but you may find useful items in these worlds. (While searching for the invisible exit from a parallel world, you may find some unexpected items.)

Draw a map for underground dungeons—
To find your way around the dungeons, and to keep from getting lost, carefully map the dungeons and write down the locations of magical drawings and monsters. We have included a map of the first dungeon to give you an idea of how to make a map. This dungeon is at the upper right corner of the starting screen (near the door with the gate).

'+' indicates the entrance.
'-' indicates the exit.
'1-4' indicate the shops.
+ markers are patterns on the floor.
COMPLIANCE WITH FCC REGULATIONS

This equipment generates and uses radio frequency energy and if not installed and used properly, that is, in strict accordance with the manufacturer's instructions, may cause interference to radio and television reception. It has been type tested and found to comply with the limits for a Class B computing device in accordance with the specifications in Subpart J of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna.
- Re-locate the NPB with respect to the receiver.
- Move the NPB away from the receiver.
- Plug the NPB into a different outlet so that the computer and receiver are on different circuits.

If necessary, the user should consult the dealer or an experienced radio/TV technician for assistance. The user may find the following booklet prepared by the Federal Communications Commission helpful:

How to Identify and Resolve Radio-TV Interference Problems

BRIDGERBUND'S LIMITED 90-DAY WARRANTY

Bridgerbund Software, Inc. ("Bridgerbund") warrants for a period of ninety (90) days following the original retail purchase of this Game Pak ("Pak") that the Pak is free from substantial defects that may materially interfere with the operation of the program as described in the end user documentation.

If you believe you have found any such error or defect, please call Bridgerbund's Technical Support Department, (415) 492-5500 during the hours of 6:00 and 5:00 Pacific time, Monday through Friday. Bridgerbund technical personnel will attempt to help you correct or avoid the problem. If any such error or defect cannot be corrected or avoided by the customer, Bridgerbund will inform you how to obtain a corrected Pak (or, at Bridgerbund's option, Bridgerbund may authorize a refund of your purchase price).

PAK REPLACEMENT POLICY

If any Pak fails within ninety (90) days for any reason other than accident, or misuse by the consumer, please return the defective Pak together with a copy of your sales receipt to Bridgerbund Software-Direct, 17 Paul Drive, San Rafael, California 94903-2103, for a free replacement.

Bridgerbund will replace Pak's damaged for any reason, whether during or after the ninety (90) day free replacement period, for $2.00 each plus a postage and handling charge of $2.00 per request, as long as the program is still being manufactured by Bridgerbund.

LIMITATIONS ON WARRANTY

Unauthorised replacements: Bridgerbund warrants only that the program will perform as described in the user documentation. No other advertising, description or representation, whether made by Bridgerbund, its dealer, distributor, agent or employee, shall be binding upon Bridgerbund or shall charge the terms of this warranty.

Implied warranties limited: Except as stated above, Bridgerbund makes no other warranty, express or implied, regarding this product. Bridgerbund disclaims any warranty that the software is fit for a particular purpose, and any implied warranty of merchantability shall be limited to the ninety (90) day duration of this limited express warranty and is otherwise expressly and specifically disclaiming. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

For technical support on this or any other Bridgerbund product, call (415) 492-5500.

No consequential damages: Bridgerbund shall not be liable for special, incidental, consequential or other damages, even if Bridgerbund is advised of the possibility of such damages. This means that Bridgerbund shall not be responsible or liable for lost profits or revenues, or be liable for or be responsible for any other costs except the actual cost of this product. In no event shall Bridgerbund's liability exceed the purchase price of this product. Such states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.
